

THE HOT PURSUIT OF TALENT

Your Invitation: Growing your business through smart training

The manufacturing industry has undergone enormous change over the past decade and one topic keeps coming up: Skills Shortage.

You're invited to attend a special presentation to discuss how your business can build a competitive workforce and close the skills gap now, and for the future.

You'll have the opportunity to have your say on education and hear about the variety of training currently available that will help fuel your company's growth.

Join us to find out how you can build your talent pipeline and the smart training options that will produce business results.

During the session, we'll cover off the important points including:

- **Creating career pathways** - resources and development opportunities available to students
- **The right competencies** - education and technical training to attract the right talent
- **Hiring outside the industry** - the growing demand for skill sets from other fields

To reserve your complimentary place, please register **ASAP** using the link below.

If you would like to bring a guest, simply request additional tickets when registering.
