

Optimising business
performance through
people and process.

 **efficiencyworks**

Optimising *business* *performance.*

Efficiency Works partners with organisations and individuals throughout Australia and beyond that are striving to *enhance performance and maximise results.*

We understand that people are the key to unlocking untapped business potential, and adopt a holistic approach to business improvement.

We provide the expertise, knowledge and tools to support people and process development, along with the associated change management challenges organisations experience.

Efficiency Works is a Registered Training Organisation (RTO No. 40575), delivering a range of industry leading training packages for organisations seeking to develop their workforces through up-skilling.

We identify, unlock and leverage the untapped potential of the people and processes that drive performance.

What we do

We identify, unlock and leverage the untapped potential of the *people and processes that drive business performance.*

50%

Reduction in setup time

25%

Reduction in downtime

Established in 2007

500%

Reduction in the physical time taken to process a product

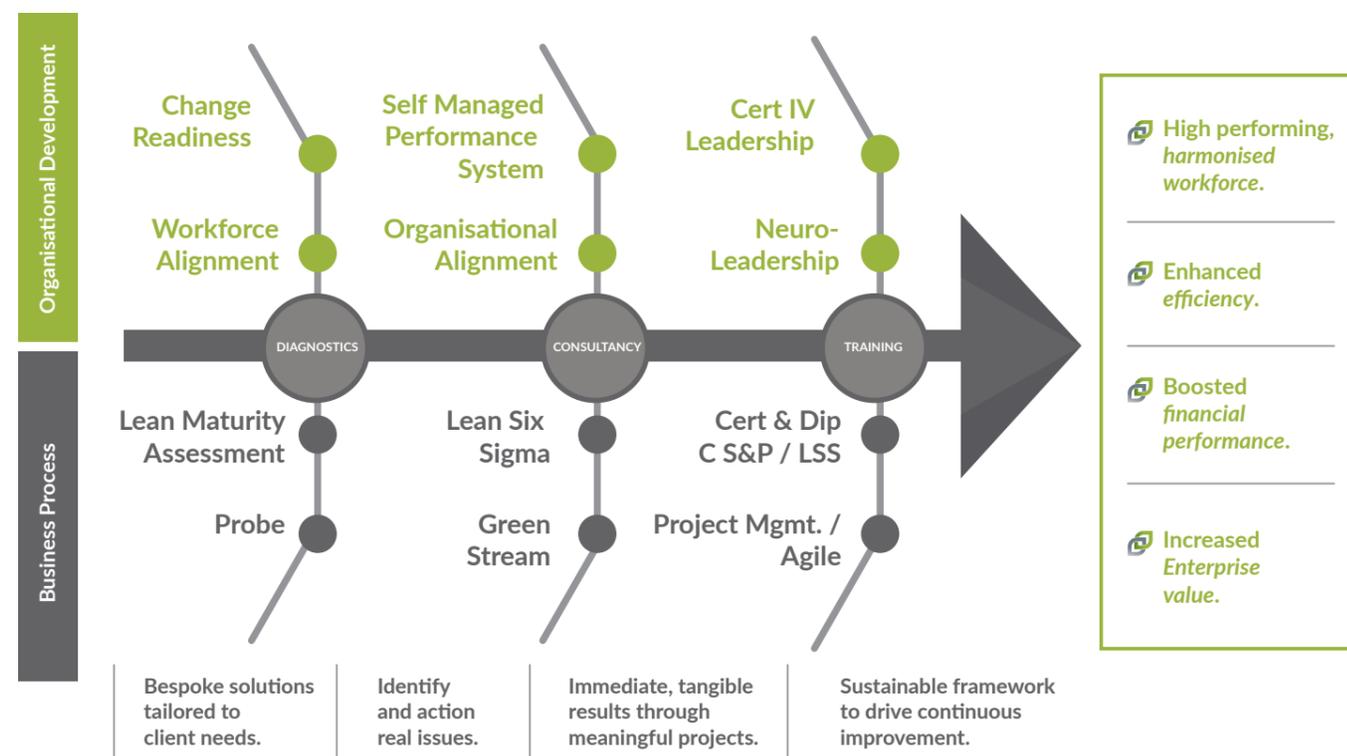

1000+

Clients serviced

-  **Unlock untapped performance**
-  **Focus on real projects within your business**
-  **Deliver immediate, real results**
-  **Boost the bottom line**

How we do it.

We apply a holistic approach to business transformation through people and process to drive operational excellence.

Diagnosics

Operational excellence benchmarking that ranks you against distinguished, award-level organisations from around the world.

Change Readiness

The Organisational Growth Indicator (OGI®) diagnostic assessment provides leaders with Tangible Metrics to validate their gut feel and accurately pinpoint previously unseen factors that are constraining their organisation's ability to grow and change adaptively. We use the Growth Leadership Indicator (GLI™) to provide tangible metrics that create a vivid snapshot of a Leader's ability to lead organizational growth and transformation.

Workforce Alignment

Workforce alignment to the strategic purpose of the organisation is critical for sustainable success in the most efficient way. Efficiency Works uses the Synergy Values Fit assessment to assess alignment and to ascertain a development roadmap for individuals and teams.

Lean Maturity Assessment

A Lean Six Sigma maturity assessment shows leaders how advanced their organisation is in terms of Lean Six Sigma perspective, its strengths, weakness and improvement opportunities. The assessment enables detailed, step-by-step, quantitative scoring to diagnose the current state.

Probe

An effective business excellence framework that gets to the heart of what a business needs to do to improve its competitiveness, productivity, innovativeness, sustainability and bottom line. Benchmark your organisation to alike companies and industries from around the world.

Consultancy

We have the proven methodology and tools that engage, align and motivate frontline workforces.

Self Managed Performance System

Practical expertise, methodology and tools to drive peak workforce performance through organisational clarity, alignment and collaboration. An easy to implement system that enables individual purpose to organisation vision and promotes collaboration through key stakeholder engagement.

Organisational Alignment

Using a combination of efficiency Works Organisation Development tools and individual assessments, Efficiency Works are able to map out a current state of alignment and the development tools and training required to reach the desired 1:1 match of individual purpose to organisation vision.

Lean Six Sigma

Lean Six Sigma is a systematic approach to continuous improvement achieved by removing wasteful non-value-adding activities and reducing process variation. The methodology, tools and frameworks can be applied to any industry and to any workplace, delivering improvements in quality, service outcomes, customer satisfaction, revenue and margins, and strengthening organisational culture.

Green Stream

Efficiency Works Green Stream methodology can be applied to any industry or government organisation. Creating the Green Stream will simplify the planning process, increase return on investment for Continuous Improvement efforts, and increase customer satisfaction.

Training

Efficiency Works is a Registered Training Organisation (RTO No. 40575), delivering a range of industry leading training packages for *organisations seeking to develop their workforces, and individuals seeking to up-skill and bolster their qualifications.*
